EXPERIENCE AND PROYECTS

Apr. 2022- Front End Developer in Avenida Más

Present Frontend development with active participation in the design and development of the application's layout.
Development of reusable, generic components in React.
Development of services using Axios and React Hooks.
Unit testing and E2E with Jest and Cypress.
Version control with Git and GitLab. Agile methodologies (Scrum) with Jira.
Back and forth communication with Product, UX and Backend teams about the app's development.

Dec. 2021- Front End Developer in The Guorking Agency

Mar. 2022 Frontend development with active participation in the design and development of websites.
E-commerce platforms management and customization (Woocommerce, Shopify, Tiendanube).
Content Management Systems (CMS). Wordpress theme customization.

Sep. 2021- Alkemy's React Acceleration Program

Nov. 2021 I completed the Alkemy's React Acceleration Program, which consisted in the development of a website and CMS for the ONG "Somos Más". The project was done with a team of eight members and we used agile methodologies (SCRUM), and Jira + Bitbucket for the code management. The project was built with React, Redux, Bootstrap and tested with Jest and React Testing Library. My certificate of completion can be found on my LinkedIn page.
