EXPERIENCE AND PROYECTS

Apr. 2022-
Present

Front End Developer in Avenida Más
Frontend development with active participation in the design and development of the
application's layout.
Development of reusable, generic components in React.
Development of services using Axios and React Hooks.
Unit testing and E2E with Jest and Cypress.
Version control with Git and GitLab. Agile methodologies (Scrum) with Jira.
Back and forth communication with Product, UX and Backend teams about the app's development.

Dec. 2021-
Mar. 2022

Front End Developer in The Guorking Agency
Frontend development with active participation in the design and development of websites.
E-commerce platforms management and customization (Woocomerce, Shopify, Tiendanube).
Content Management Systems (CMS). Wordpress theme customization.

Sep. 2021-
Nov. 2021

Alkemy's React Acceleration Program
I completed Alkemy's React Acceleration Program, which consisted in the development of a
website and CMS for the ONG "Somos Más". The project was done with a team of eight members
and we used agile methodologies (SCRUM), and Jira + Bitbucket for the code management. The
project was built with React, Redux, Bootstrap and tested with Jest and React Testing Library. My
certificate of completion can be found on my Linkedin page.

SKILLS

HTML + CSS + JS	Nodejs	Git, GitLab
React + Typescript	Express	Jira
Redux	MongoDB	Wordpress, Shopify
Sass, Bootstrap	SQL	Testing (Jest, Cypress)
